

Thailand Policy Framework and Measures for Air Pollution Monitoring and Management

Kessinee UNAPUMNUK, PhD.
Director of Transboundary Air Pollution Sub-division,
Air Quality and Noise Management Division
Pollution Control Department
Ministry of Natural Resources and Environment
Thailand

ASEAN Cooperation Workshop on Transboundary Air Pollution: Integrating Technology, Policy and Field Practices for Sustainable Air Quality
3 February 2026
Chiang Mai, Thailand

Air Quality Situation in Critical Areas

■ 17 Northern Provinces
PM_{2.5} (January - April) - Transboundary Haze Pollution

▲ Bangkok Metropolitan Region
PM_{2.5} (November - March)

▲ Na Phra Lan Subdistrict (Saraburi Province)
PM_{2.5} and PM₁₀ (January - May)

▲ Map Ta Phut and nearby areas, Rayong Province : VOCs

▲ Southern Provinces
PM_{2.5} (July - September) - Transboundary Haze Pollution

Ambient Air Quality Monitoring Stations Network

**Automatic Ambient Air Quality
Monitoring Stations**

**107 Stations
77 Provinces**

Air Pollutants

**PM₁₀
PM_{2.5}
O₃
CO
NO₂
SO₂
Pb**

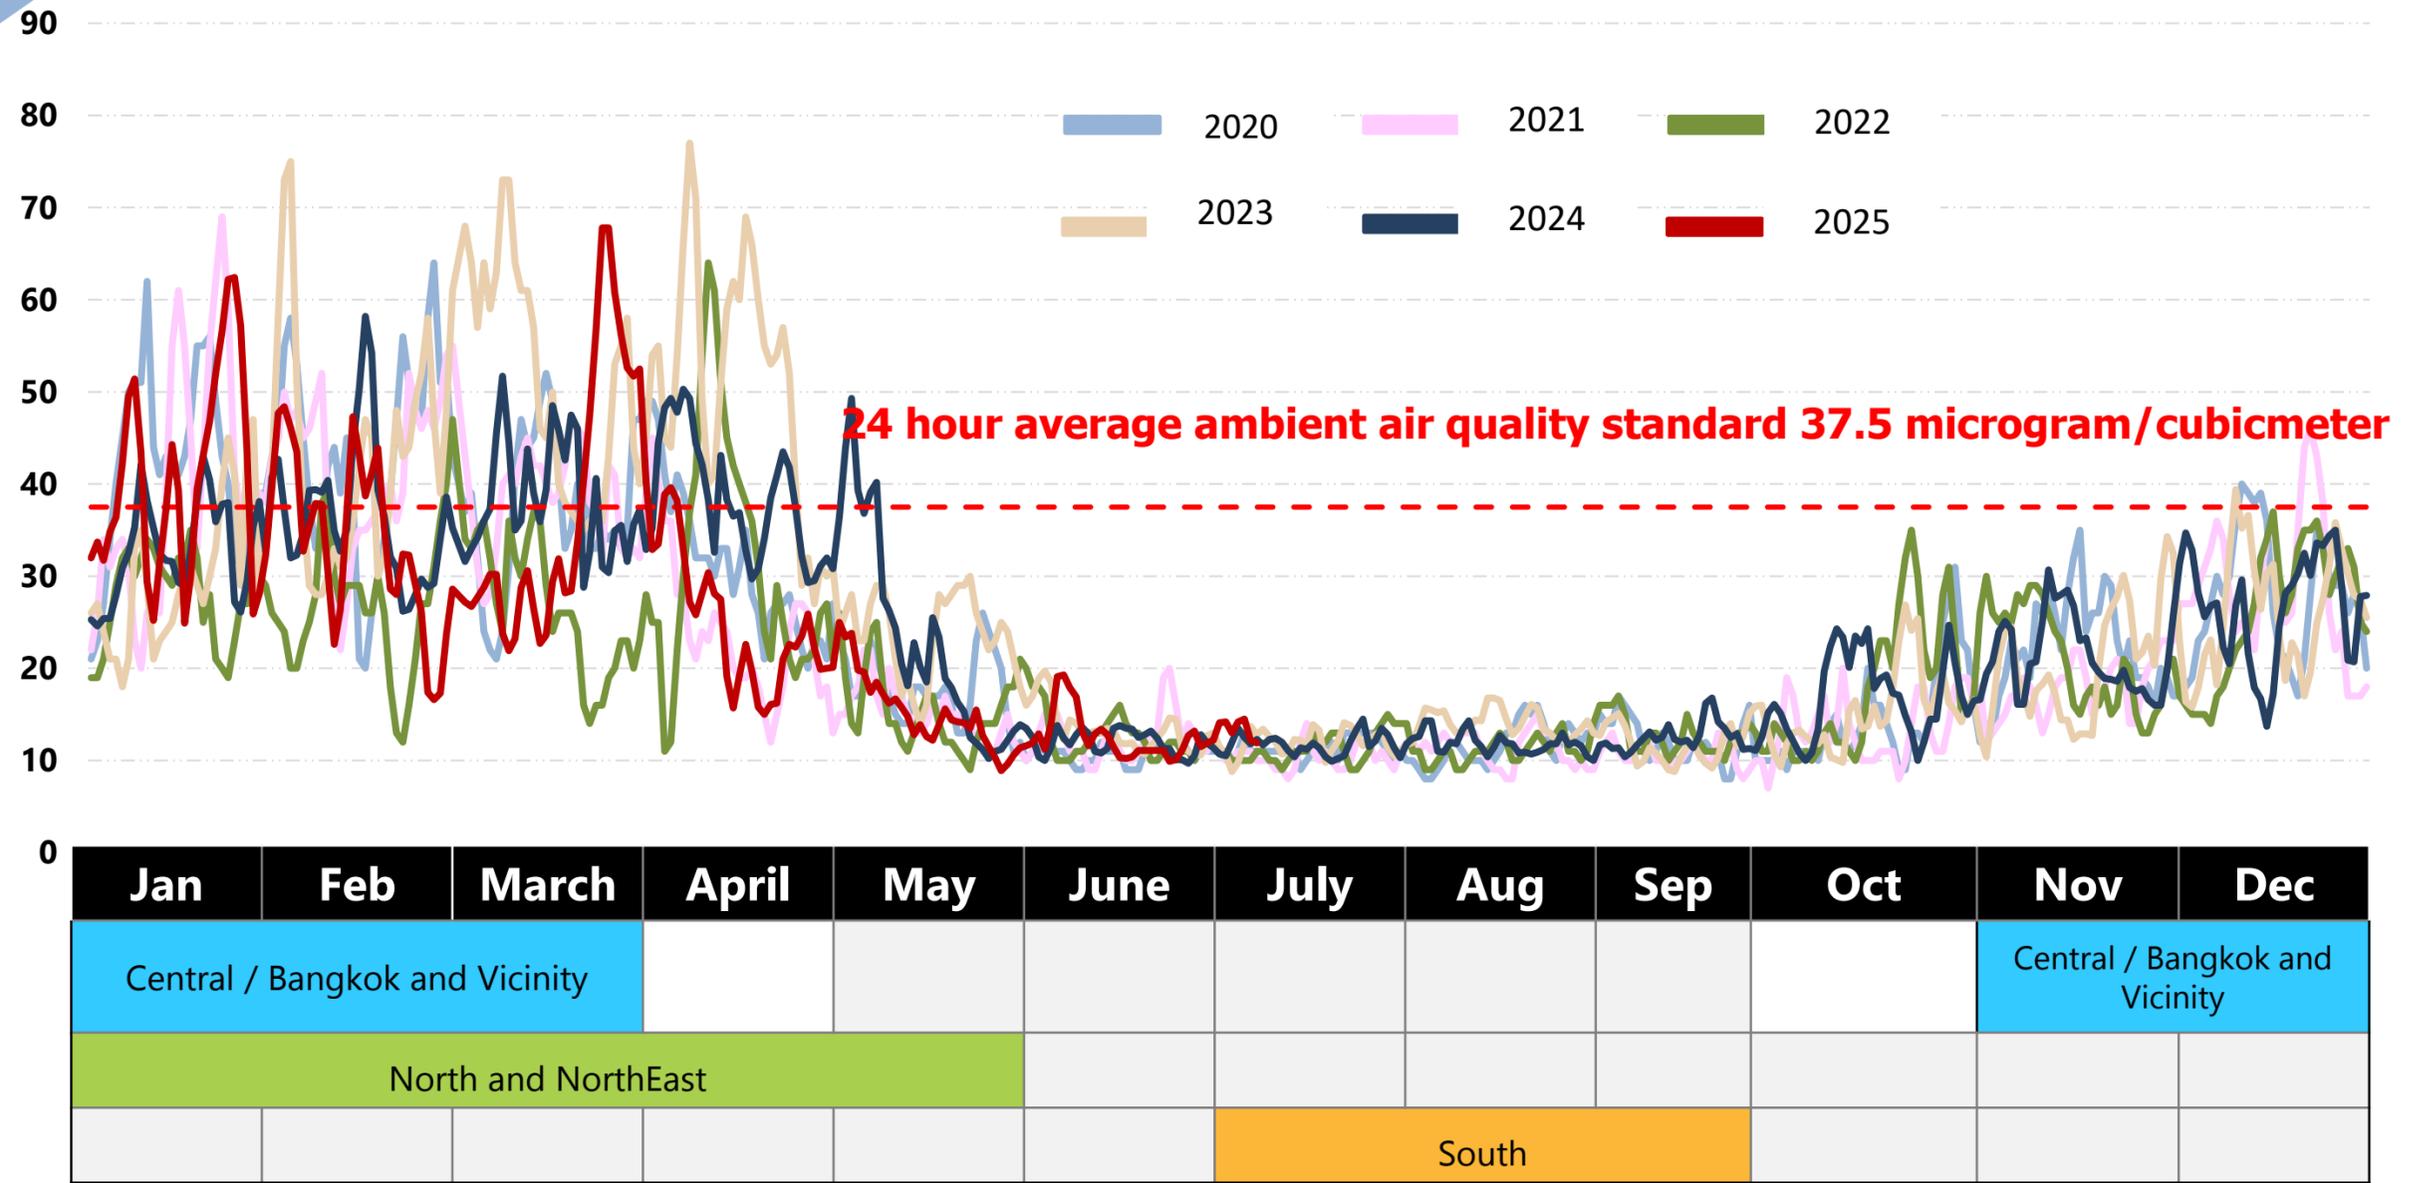

Meteorological Conditions

**Wind Speed
Wind Direction
Temperature
Barometric Pressure
Relative Humidity
Rain**

PM_{2.5} Concentration from 2020-2025

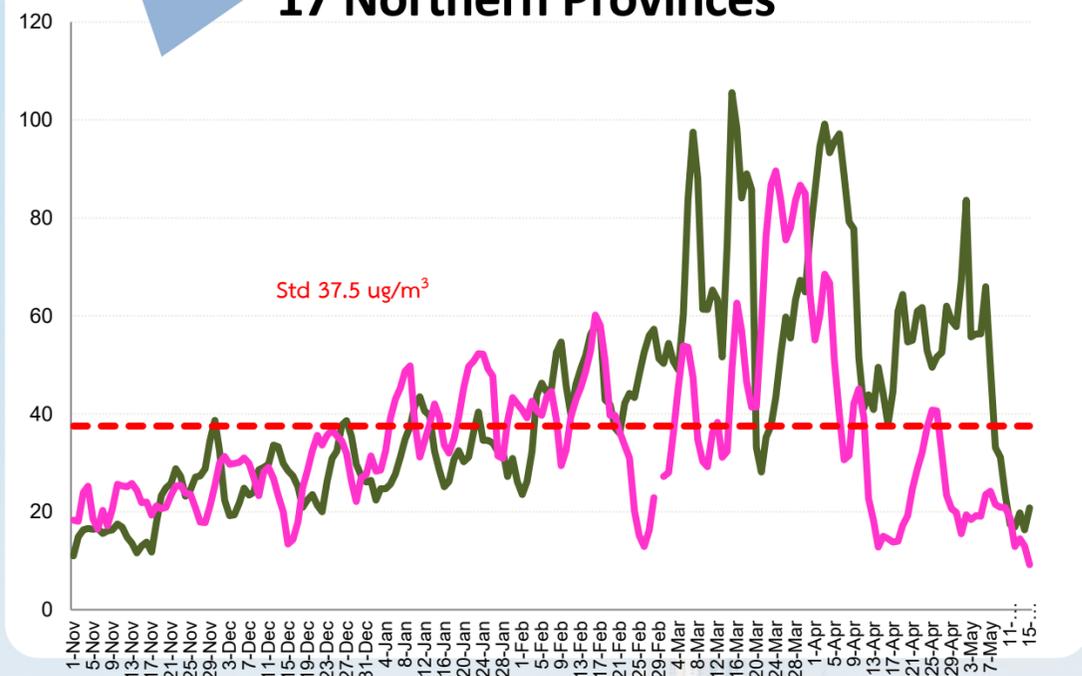

2023 Thailand announce the new ambient air quality standard for PM_{2.5} concentration

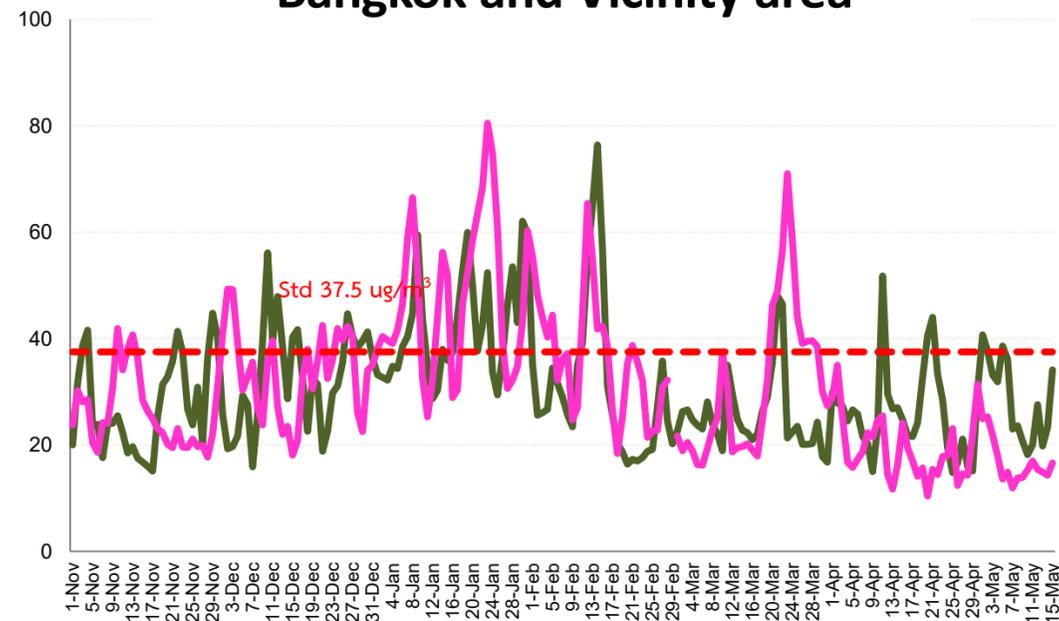

- Annual average change from < **25 ug/m³** to < **15 ug/m³**
- Since 1 June 2023 AAS for PM_{2.5} 24 hr average change from **50 ug/m³** to **37.5 ug/m³**

PM_{2.5} 24 hours average concentration 1 November – 15 May 2024 vs 2025

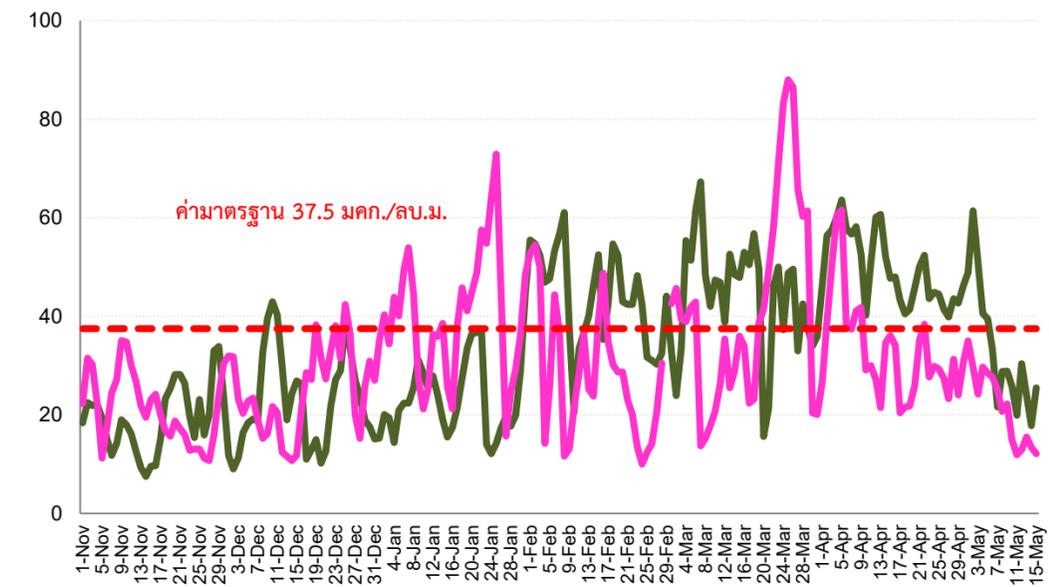

17 Northern Provinces

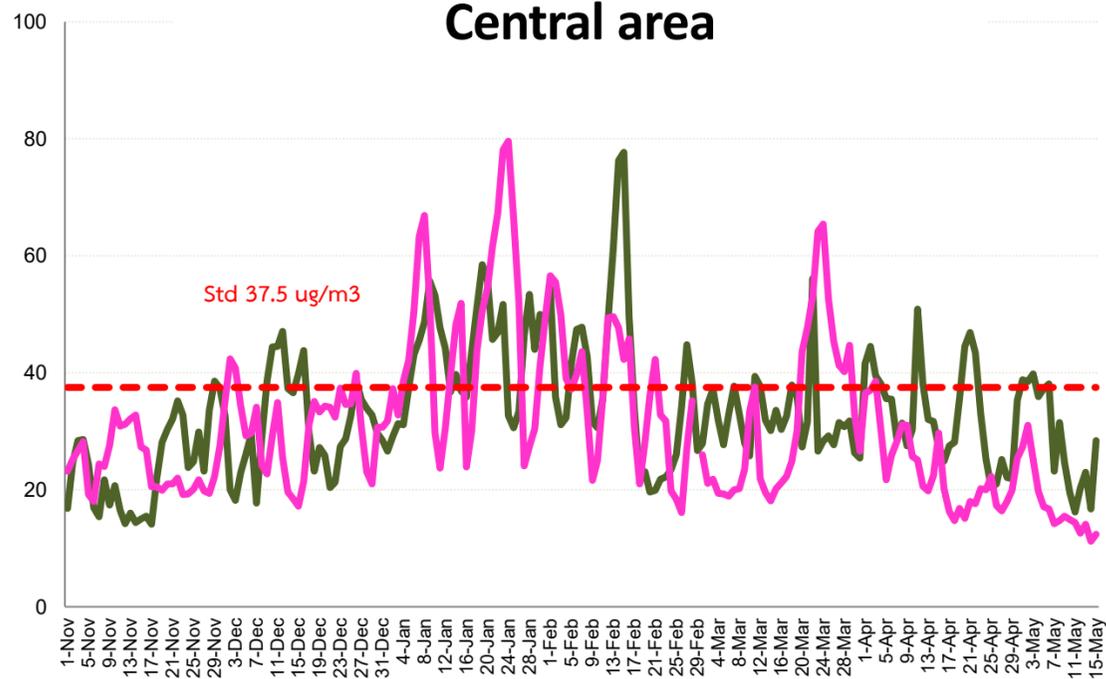

Bangkok and Vicinity area

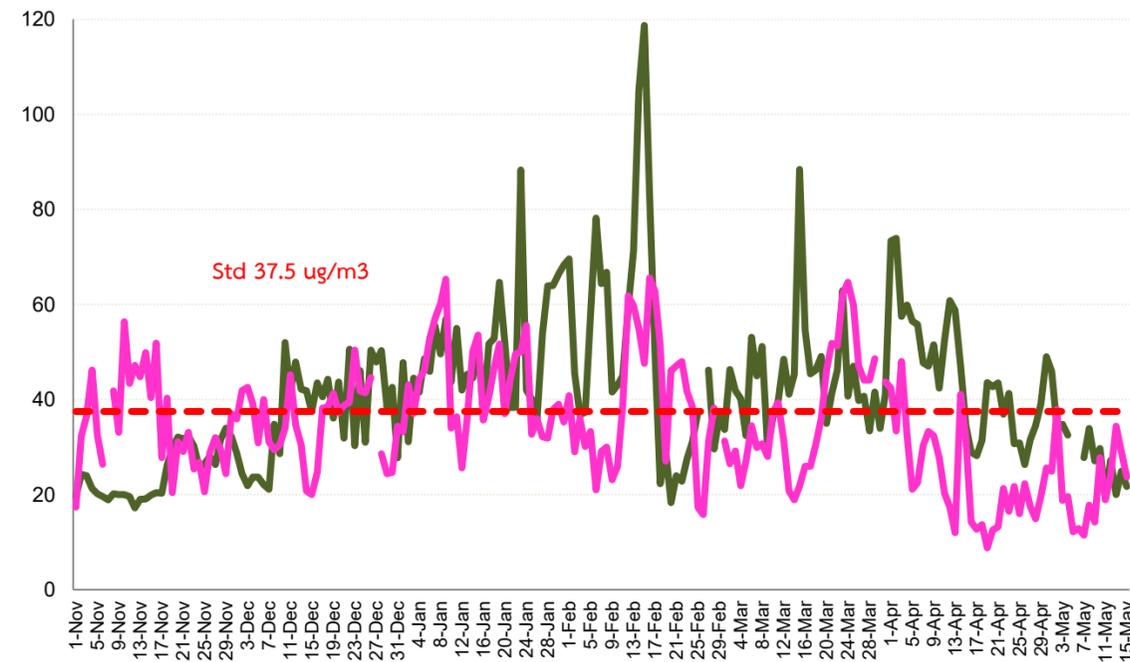

North Eastern area

Central area

Western area

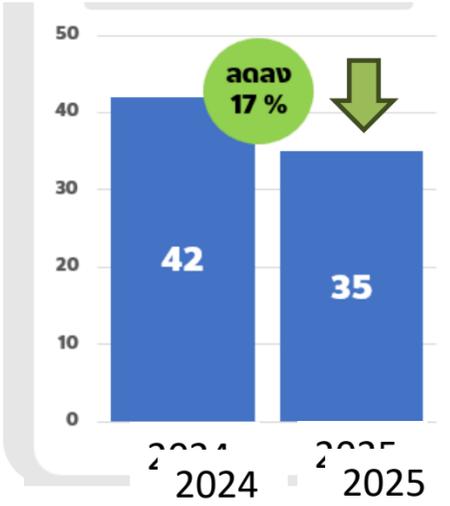

2024
2025

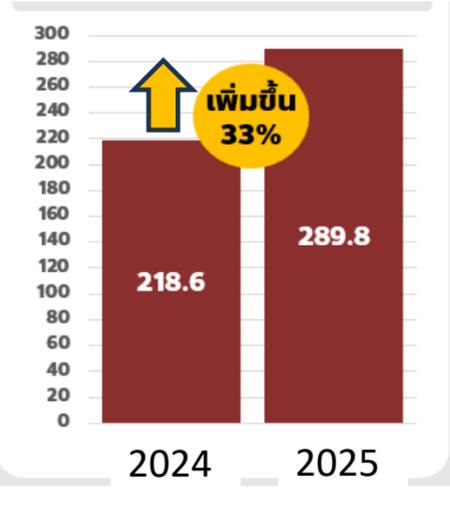

Air Quality Management (PM_{2.5}) Indicators 1 November – 15 May 2024 vs 2025

17 Northern Provinces

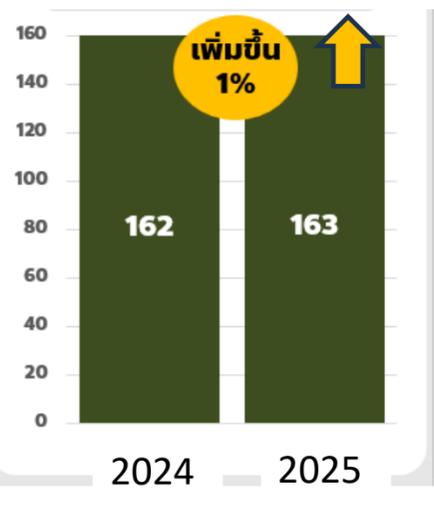

24 hr avg. concentration (ug/m³)

max 24 avg. concentration (ug/m³)

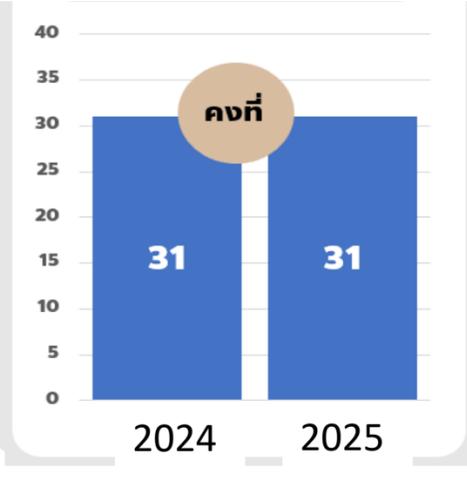

days exceed std. (days)

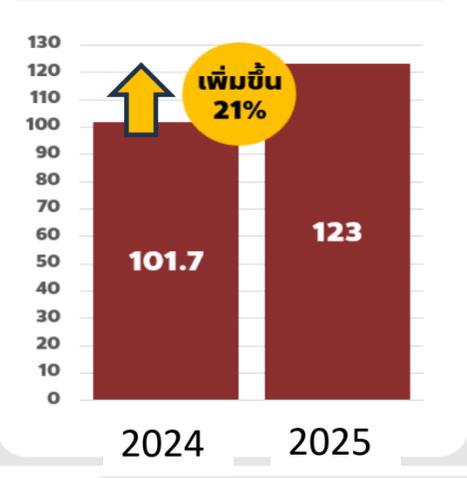

Bangkok and Vicinity area

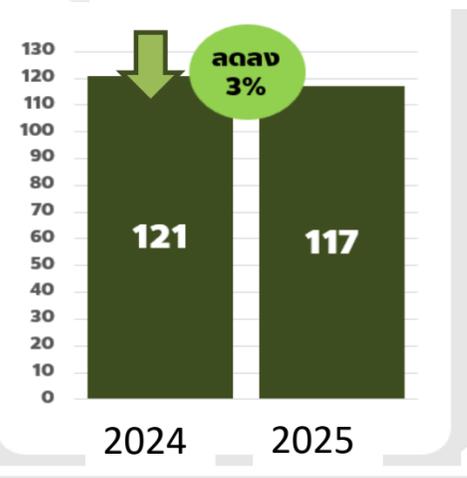

24 hr avg. concentration (ug/m³)

max 24 avg. concentration (ug/m³)

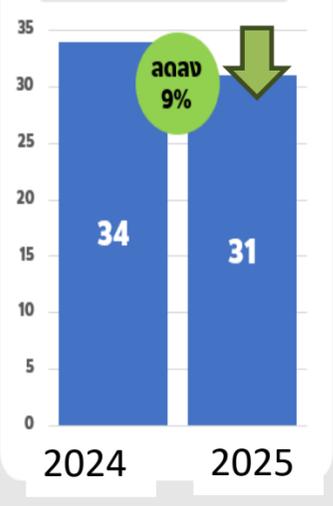

days exceed std. (days)

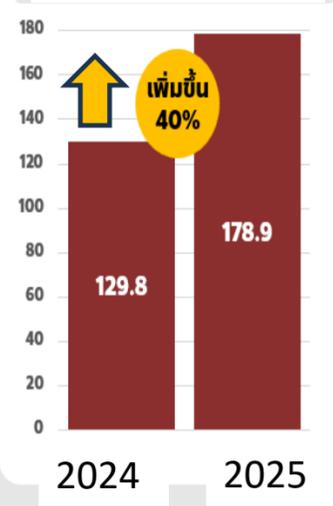

North Eastern area

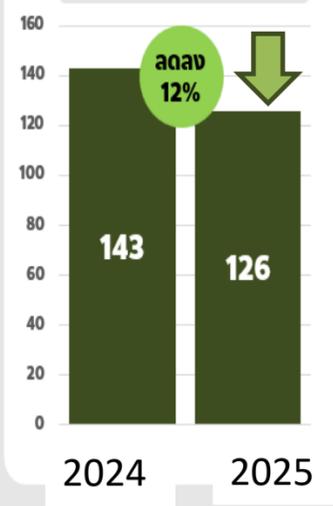

24 hr avg. concentration (ug/m³)

max 24 avg. concentration (ug/m³)

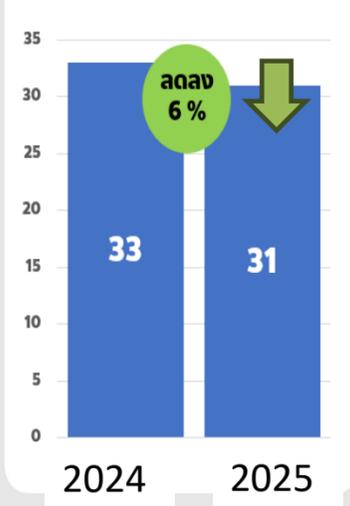

days exceed std. (days)

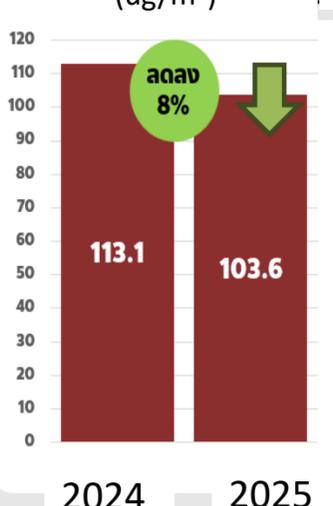

Central area

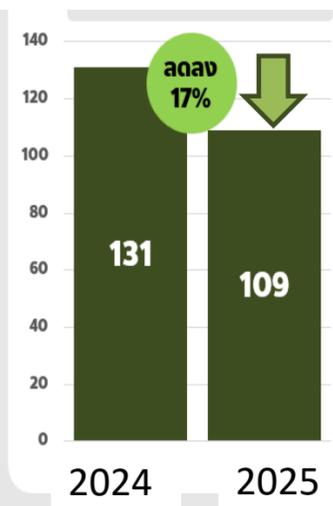

24 hr avg. concentration (ug/m³)

max 24 avg. concentration (ug/m³)

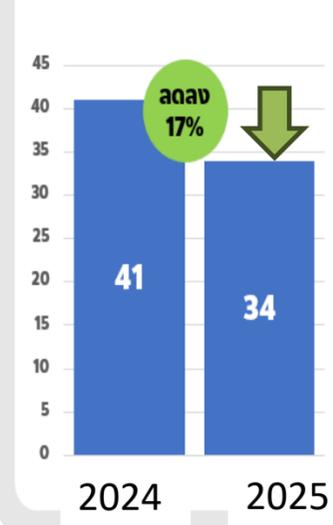

days exceed std. (days)

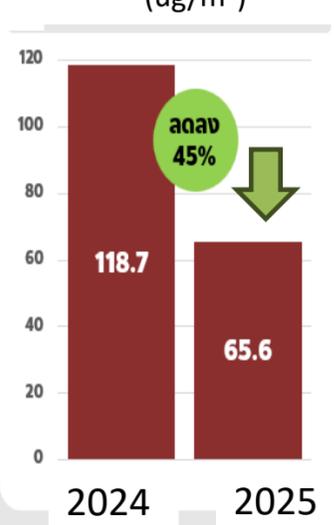

Western area

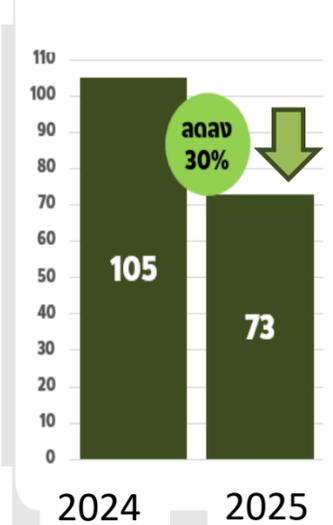

24 hr avg. concentration (ug/m³)

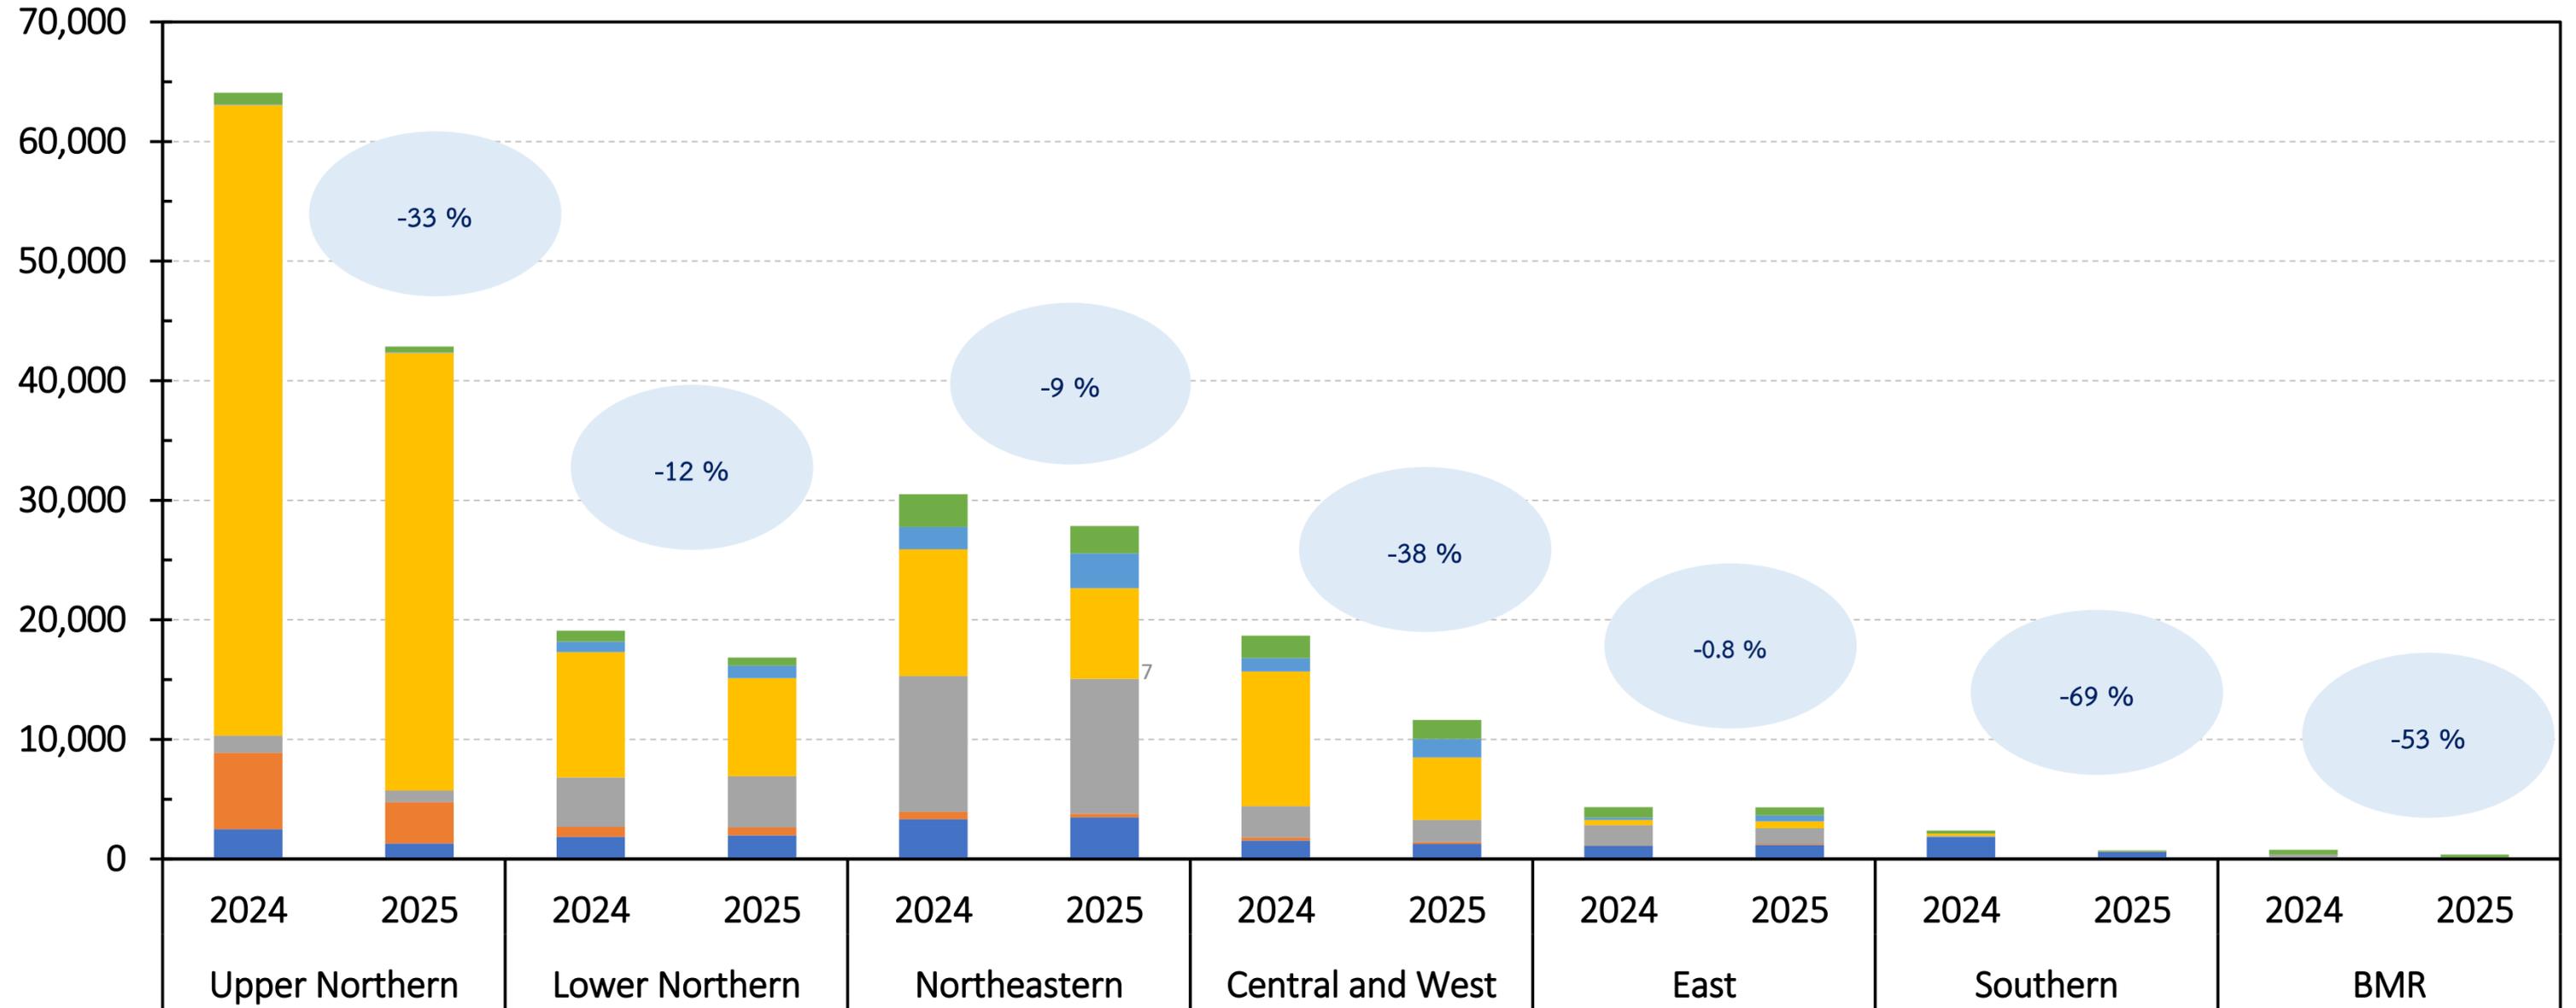

max 24 avg. concentration (ug/m³)

days exceed std. (days)

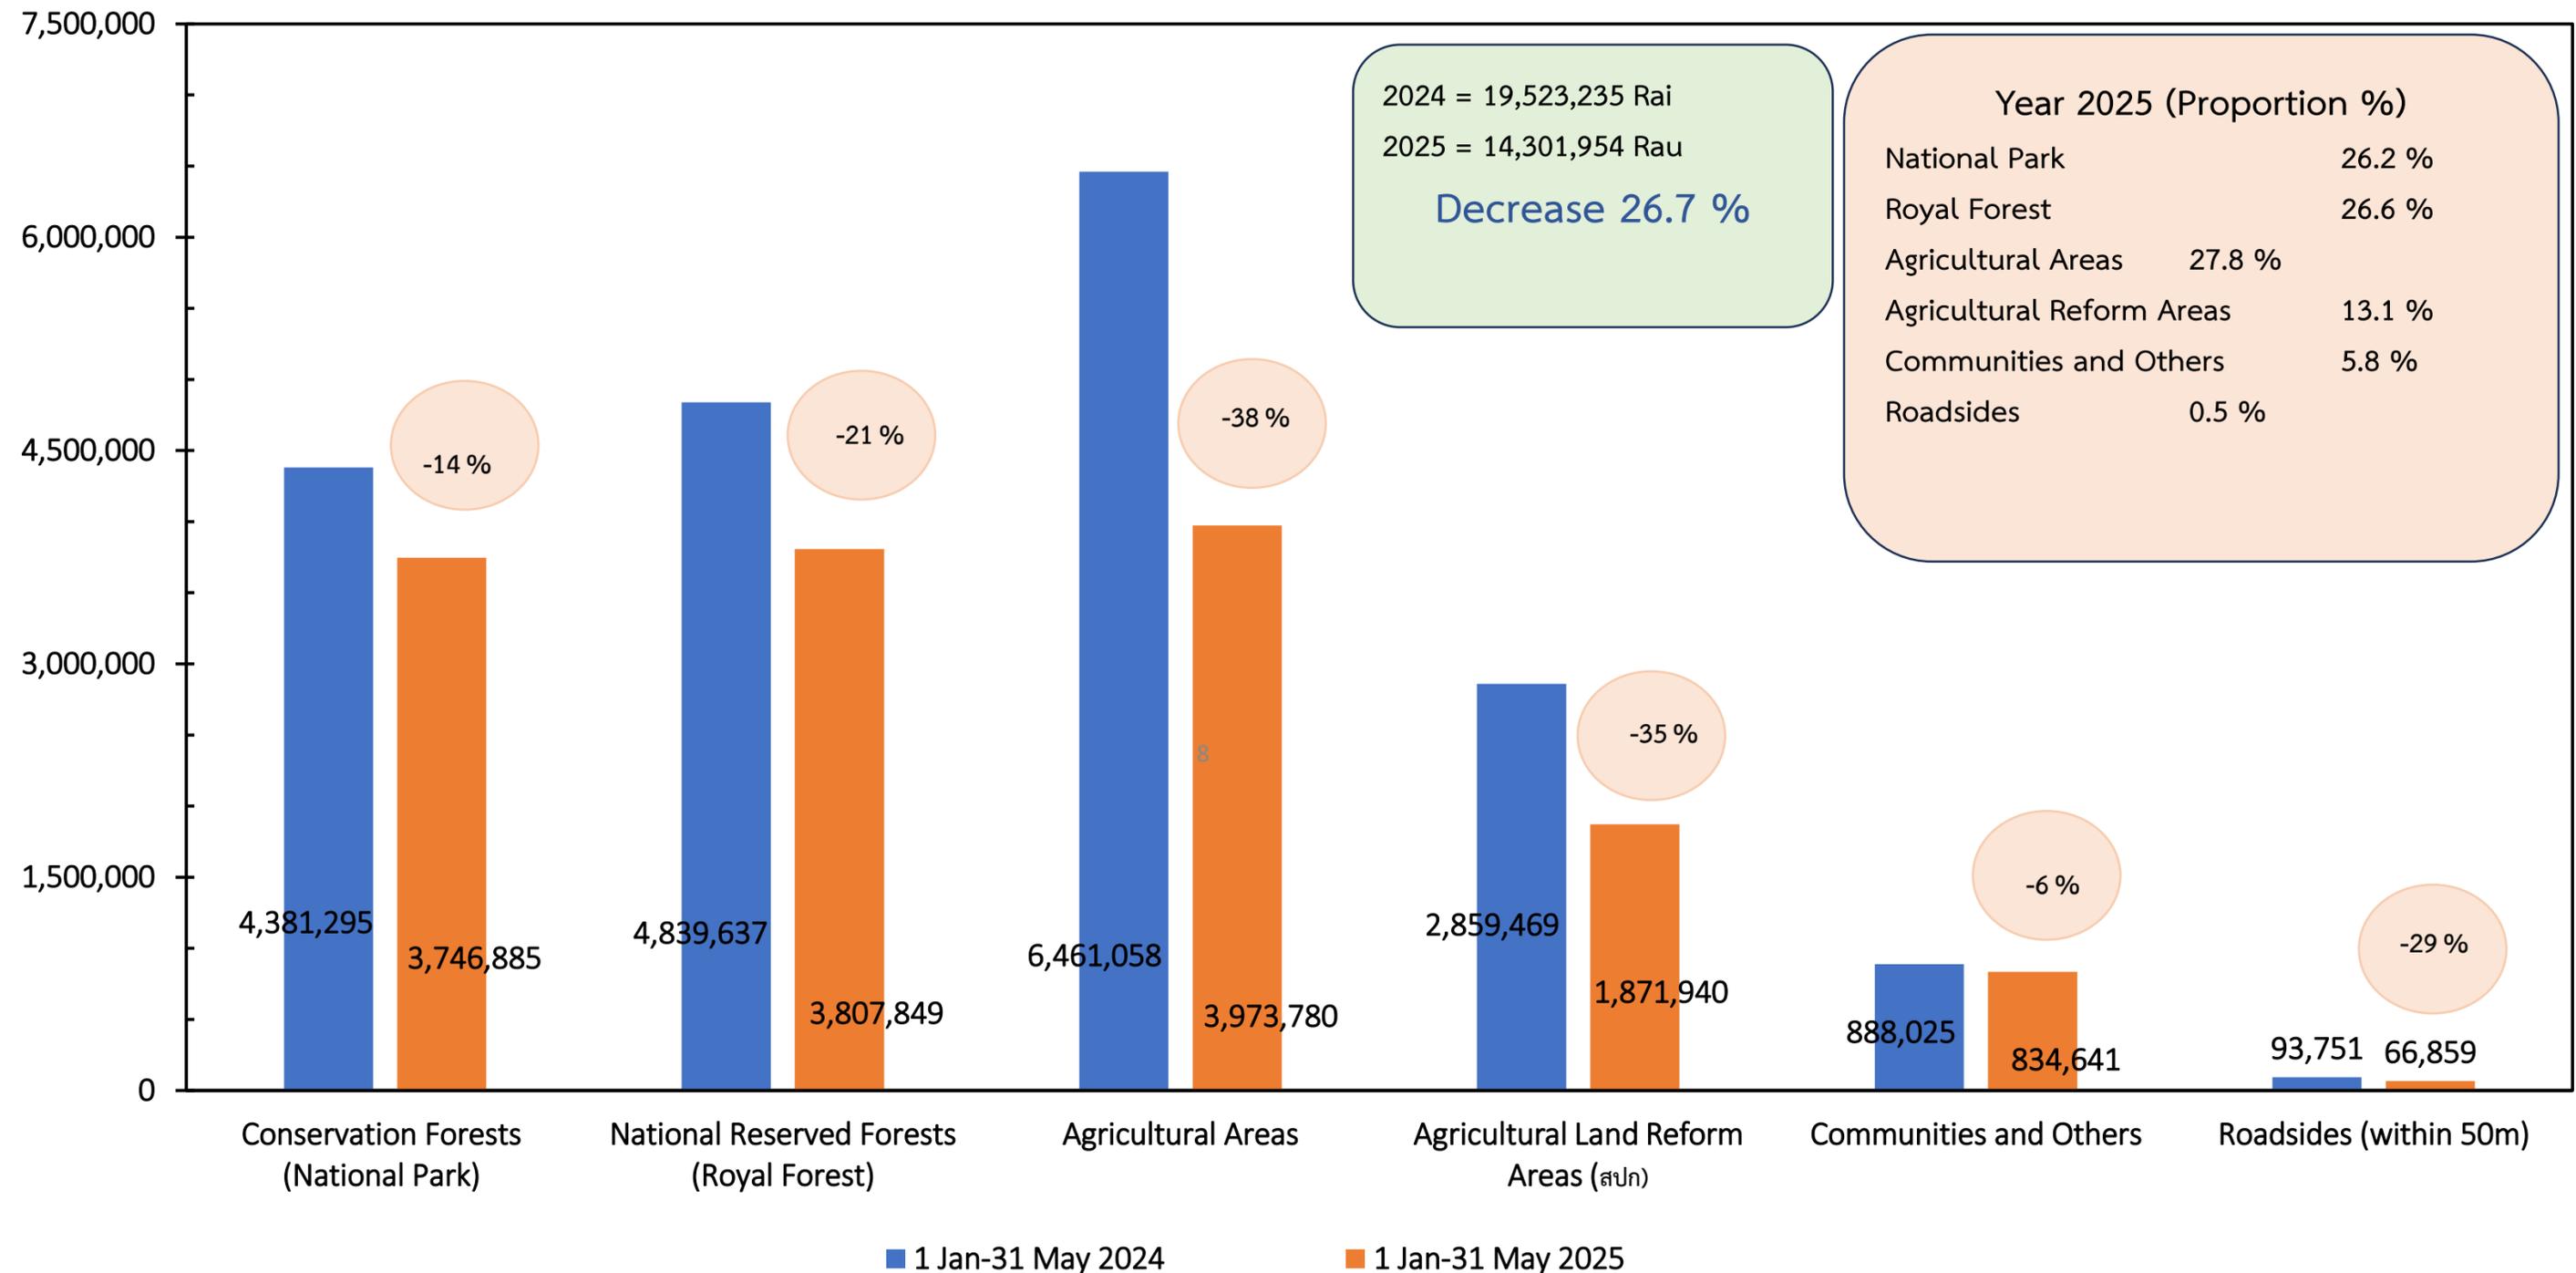

Number of Hotspots by Land Use Type Comparison between 2024 and 2025 (1 Nov – 31 May)

■ Other Agriculture
 ■ Maize and Shifting Cultivation
 ■ Rice Fields
 ■ Forest Area
 ■ Sugarcane
 ■ Others

Burned Area (Rai): Comparison between 2024 and 2025 (1 Jan - 31 May)

Source: Landsat 8, 9 imagery, interpreted by GISTDA

Air Pollution = National Agenda

Policy driven by National Committee at Central, Regional and Province level

National Committee Chaired by Vice Prime Minister
Committees: inter-governmental agencies

Enhancing the Management of forest fires, Haze, and PM_{2.5} Pollution in Urban and Agricultural Sectors through Economic Instruments

Level up Ambient Air Quality Standard and Emission Standard
- Smoke emission standard from 30% to 20%

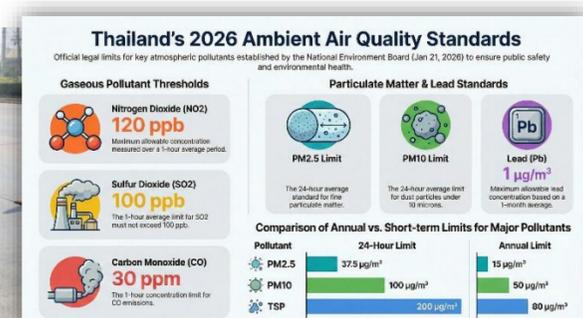

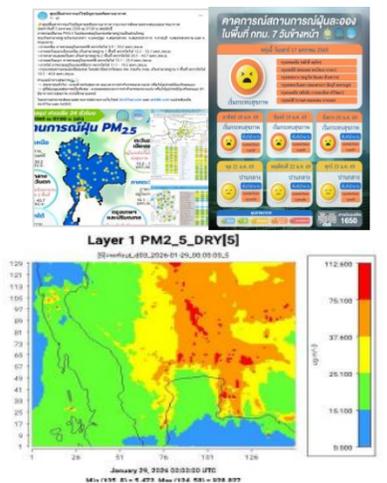

EURO 6 for benzene Large size vehicle

Green List Plus

Work From Home

Promoting the Control of Pre/Post -Harvest Sugarcane Burning, Supporting Low-Interest Loans, and Utilizing Agricultural Residues as Fuel

Air Pollution Management Communication Center
Function: Reporting, Forecasting, and Issuing Alerts on PM_{2.5} Pollution Levels

	2566	2567	2568	2569
เบนซิน (Benzene)	EURO 4	EURO 5 (1 ม.ค. 67)	EURO 6 (1 ม.ค. 68)	EURO 6 (1 ม.ค. 69)

Thailand National Action Plan for Particulate Matter Prevention and Control (2025 – 2027 and the next 5 years)

1st National Action Plan

Precautionary Principle

- Enhancing air quality management
- Focus on area base during crisis season
- Reduce and Control air pollution emission for major sources

2nd National Action Plan

AIR POLLUTION
CLEAN AIR

Integrate approach for air quality management

Prevent Protect and Control Air Pollution Emission from Major sources

Multi-stakeholder Cooperation for Clean Air

- Prevent and control air pollution emission from industrial, transport, forest, agricultural and urban area
- Apply economic instrument, technology, administrative mechanism, law and registration enforcement
- Cover urban area, forest area, agricultural area and transboundary air pollution
- In line with the Draft Clean Air Act

Concept

Vision

Focus

5 Measures

Thailand National Action Plan for Particulate Matter Prevention and Control (2025 – 2027 and the next 5 years)

Urban

Transportation Industry

34 measures

Forest

Preserve forest
community forest

13 measures

Agricultural

area/Agricultural

forest area

21 measures

Transboundary air pollution

8 measures

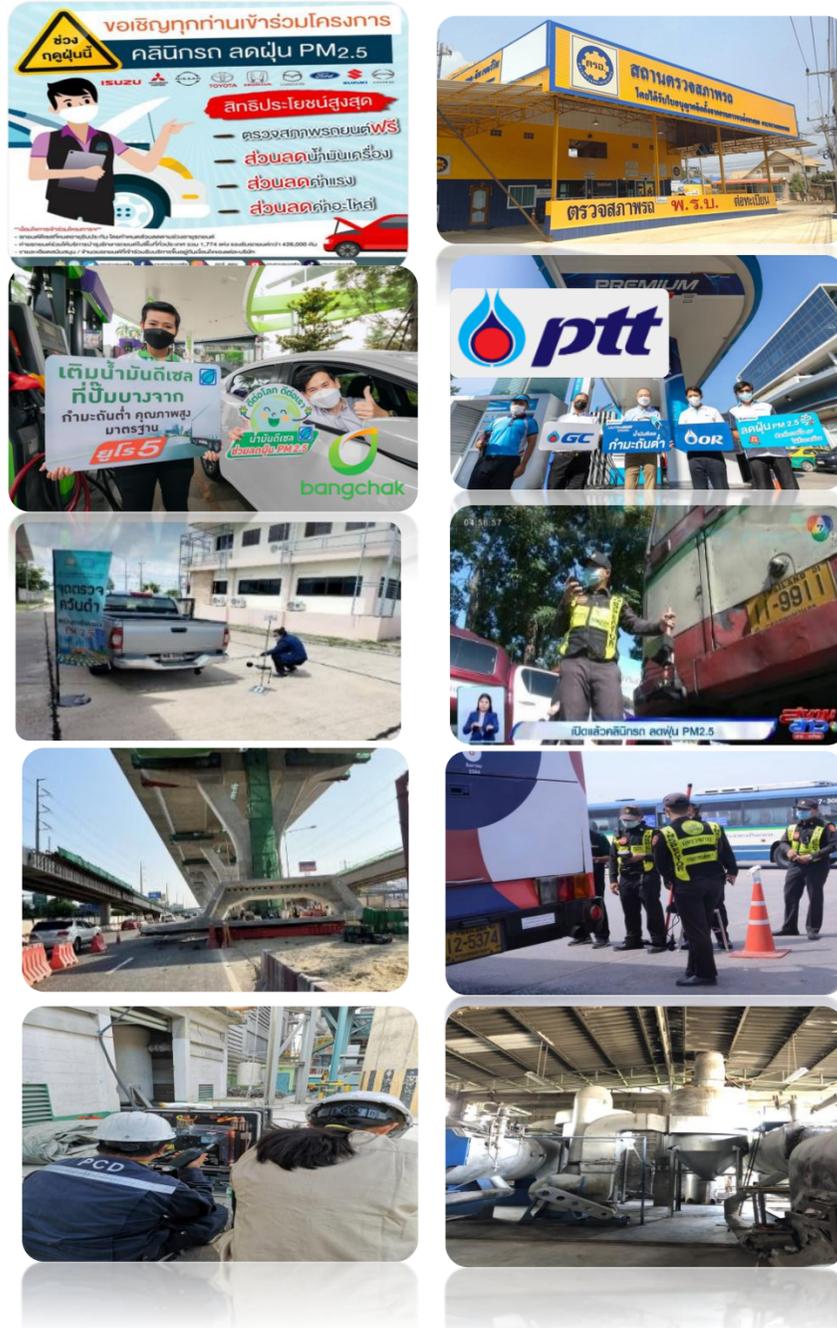

Enhancing air quality management

8 measures

Urban area

Highlight Actions

- Enforcement of Euro5 oil standards
- Strengthening annual vehicle inspection
- Inspection for black smoke vehicles/ issue prohibit sign for black smoke vehicles
- Providing M&I services and BMA Low Emission Zone
- Encourage WFH measure during PM_{2.5} crisis
- Plants inspection for potential PM emission industry

Forest area

Highlight Actions

- Priority on **14** cluster of the most burnt detected conservative and preserved forest area
- Set up Forest fire checkpoints/interception points/surveillance points
- Closing service protected forest area during crisis
- Gathering human resources and fire extinguishing equipment in the target area
- “**Knock door**” strategy and MOU between officers and community for Forest Fire Prohibit

Agricultural area

Highlight Actions

- ✓ **Focus on corn, rice and sugarcane plantation area**
 - from conventional practice to no-burning agricultural practice
- ✓ **Agricultural fire risk area database**
- ✓ **Register and guideline for open burning permit criteria**
 - create guideline for open burning with permit condition
- ✓ **Incentive for no burn agricultural products**
 - higher price for no burn sugar cane buyer
- ✓ **Traceability and GAP PM_{2.5} Free**

Transboundary air pollution

Actions

- Create **database** for source of transboundary air pollution
- Level up **trilateral and bilateral** cooperation
- Transboundary air pollution **data center**
- Forest fire suppression **training center**
- Promote no burn/**zero burning agricultural products**
- Encourage **private engagement** on green supply chain
- Introduce **traceability** system
- Sharing experience on **highland agricultural sustainable management**
